The only gamma spec analytes we have are Cs-137. I believe we can get any gamma emitters that we want without extra cost, but I'm not sure how that will affect the TAT. Should I request all that are on the list?

In addition to gamma spec, we requested the following:

Gross alpha/beta

Isotopic Plutonium 239/240

Isotopic Uranium 234/235/238

Isotopic Strontium 90

Isotopic Americium 241

Kristie

Heth and Kristie,

Here is the list of analytes that the state has proposed. How does this compare to what you are requesting from the labs?

M
